

Diana Carvalho

Hello.

7 March 2016

Portugal,
Lisbon

Dear RocketInternet,

I was excited to see your opening for UX Designer, and I hope to be invited for an interview. I studied Computer Science in the University of Lisbon, you can see my CV for more details about my education.

My background includes working in a bank as software developer, in a startup company and in a small company building websites. Most recently, I work as a freelancer in Portugal, Lisbon. I am hired to design and create websites for their business. I am very proud of this accomplishment not only for the technical work, but also for proof my entrepreneurial spirit.

I did several different works, since business cards to a website for human resources. I always use Photoshop & Illustrator, recently Sketch for the design, and LESS, HTML, Bootstrap, Git(version control), RubyOnRails(backend) and Javascript/JQuery.

Recently I start to learn more about prototyping, by doing a course of [IDEO.org](https://www.ideo.com/education/) and also start to learn React.JS to improve my skills and performance.

Previously, I worked in a small company as a software developer, building the websites, and I had a experience in a bank as a software developer. In these positions I had to be dynamic and do a little bit of everything, and more in the small company.

I discover I love design but also enjoy coding specially the front-end. I am eager to learn, very creative, always want to meet new people and new cultures.

I am looking for an opportunity to learn and be part of a promising company, with a dynamic and fun environment. I am confident that I can help with my problem-solving skills and ambition to learn more.

Sincerely,

Diana Carvalho
